PREFACE

RETAIL prices are expressed in India generally in terms of the number of sers (one ser=2·057 lbs) per rupee and were hitherto so published in tables Nos. 1 to 13 of this Volume. In the present issue, for convenience of comparison with wholesale prices, retail prices are shewn in terms of rupees and decimals of a rupee per maund (82·286 lbs).

The tables have been limited to twenty-five years together with the base year 1873 or any later year in which prices were first quoted.

NOTE ON VARIATIONS IN PRICES OF FOOD GRAINS AND SALT

REASON FOR FLUCTUATIONS IN PRICES IN EACH QUINQUENNIUM.

1861—65

A general rise of prices took place about 1860. With the suppression of the Mutiny and the transfer of the administration to the Crown, there commenced a new era of commercial and industrial activity. The resources of the country were developed by the construction of roads and railways, the improvement of harbours, and the extension of irrigation. The cotton famine caused by the American War of Secession (1861—65) gave a great impetus to the cultivation of cotton in India, which, while the war lasted, brought large profits to the cultivator and the merchant. The influx of the precious metals which had begun about the time of the Mutiny was thus further stimulated, and from about the second year of the war a great rise of prices took place throughout the cotton-growing districts of Western and Central India, as also in a smaller degree in other parts of the country. Prices were also raised by the famine of 1861 in the Upper Doab of the province of Agra and the neighbouring districts of the Panjab and Rajputana and by the scarcity in Cutch.

1866—70

On the collapse of the inflation caused by the American war, prices would have fallen but for the great famine of 1866 in Orissa, which extended into Bengal proper, Bihar, Madras, and the eastern part of the Central Provinces. Another notable famine—that of 1869—affected Western Rajputana and parts of Northern India, and the extension of scarcity, towards the west and south, produced a rise of prices in Bombay, the Central Provinces, and Hyderabad.

1871—75

During 1871—75 prices were not seriously disturbed by any calamity except the scarcity in Bihar of 1874, and although large purchases of grain were then made by the Government and scarcity prevailed in the adjoining districts of the United Provinces, the disturbance of prices was not widely felt. The export trade in rice expanded greatly in 1872-73, and was on a large scale throughout the decade 1871—80. It showed greater contraction in 1874, the year of the Bihar famine, than in the Deccan famine three years later.

1876—80

In this quinquennium occurred the great famine of 1877-78 which affected an enormous tract in Western and Southern India and extended with diminished intensity into the North, causing a general rise of prices of food-grains all over India. The export trade in wheat, which had begun in a small way after the opening of the Suez Canal in 1870, received a check in the years 1878—1880.

1881—85

Speaking generally, all crops except rice were good or abundant during these years, though there was scarcity in a portion of the Panjab in 1884 and distress in parts of Bengal and Madras in 1885. The rice crop was bad between 1883 and 1885 owing to drought and floods, but wheat was plentiful, and the average price for all grains was low.

1886—90

It is difficult to find adequate reasons for the great rise in prices which took place during these five years, for the 1889 famine in Ganjam (accompanied by distress in Orissa and scarcity in Bihar) was only of local importance, and prices had already reached their highest point in 1888. The export trade in food-grains was not larger than in the preceding quinquennium.

1891—95

The high prices ruling during 1886—90 were still further raised in 1891-92 by prolonged drought, causing scarcity and distress in Madras, Bombay, the Deccan, Bihar, and Upper Burma. A strong Indian demand for rice was coupled with large exports, and at the same time there was an unprecedented exportation of wheat owing to the failure of crops in Europe, so that Indian prices rose almost to famine levels. With better seasons prices fell, but the lowest point reached in 1891—95 was still above the average level of the previous quinquennium; and, as in that period, the importation of silver for coinage continued on a large scale until the closure of the mints in June 1893.

1896—97

The year 1896-97 was one of intense and widespread famine. The climatic conditions in the autumn were generally most unfavourable, and it was certain by the end of November that famine must supervene over a great extent of the country. It was most severe in the North-West Provinces and Oudh, and in the Central Provinces, where the calamity was seriously aggravated by the fact that in these territories there had been two previous years of short harvest. The winter rains, however, did good to the greater part of Madras, Bengal, Western India, and Rajputana, and also the greater part of the Panjab. The prices of food had been higher than usual in Northern and Central India before the failure of the autumn rains ; but they had been moderate in Bengal, Madras, and Bombay up to September 1896. In September 1896 prices rose suddenly and in October famine prices were reached in Northern and Central India, though in Bengal, Madras, and Bombay the highest level was not reached till some months later.

For the years from 1897-98 onwards the chief reasons for the fluctuations in the prices of the principal food-grains are given in the tabular statement below:

1897—1908

1897-98

	Rice	Wheat	Jawar	Oilseeds	Cotton	Other crop (Indigo)
Area . (acres)	70,783,749	19,946,164	23,806,449	12,566,648	8,914,996	1,366,513
Export . (cwts)	26,746,661	2,392,607	642,560	12,553,080	3,722,526	133,849
General conditions prevailing in India	Generally good monsoon. Area slightly in excess of average and yield largely exceeds average.	Season favourable in Northern India but not so in Central and Western India. Area below average but yield above average.	..	Excellent yield of rape, mustard and linseed, specially in the Panjab.	Generally favourable in Bombay and Madras. Area slightly below but yield about average.	..
Bengal . . .	Very good season and yield in excess of a full average crop.	Favourable season and satisfactory yield.	..	Good crop, though restricted area.	Season on the whole favourable.	Decreased area. Crop damaged by absence of seasonable rain or excessive rain.
Assam . . .	Harvest was a good one owing to sufficient rainfall.	..	..	Yield of oilseeds was poor. Crop suffered from floods caused by earthquake.	..	..
N.-W. P. & Oudh .	..	On the whole favourable season and yield up to average.	..	Good crop, though restricted area.	On the whole conditions and quality of crop good.	Unfavourable season. Crop damaged by flood.
Panjab . . .	..	Favourable season and yield normal.	..	Good crop . .	Decreased area but yield above average.	Generally good crop.
Bombay . . .	..	Season not very favourable for sowing, but yield fairly satisfactory.	..	Area decreased. Outturn deficient. Good rapeseed crop.	Yield materially smaller than average.	..
Central Provinces .	..	Rain insufficient for early sowings but good for late crop. Yield on the whole fair.	Millets gave a bumper outturn.	Area decreased. Outturn deficient. Good rapeseed crop.	Season on the whole favourable; yield above average.	..
Madras . . .	Sufficiently good season; fair yield.	..	Prices of millet rose high, 40 per cent above previous year's.	Outturn greatly below average.	Crop injured by blight or drought; yield below average.	Decreased area but crop fair.
Burma . . .	Uniformly favourable season. Yield above average.	..	..	..	..	..

Bengal	Season not unfavourable. The winter rice crop was 94 per cent and autumn 87 per cent of an average crop.	Season unfavourable. Yield little below average.	..	Season not favourable	Season unfavourable owing to deficient rainfall	Season unfavourable for indigo, and outturn worst on record, being 50 per cent of average.
Assam	Outturn of early rice was good but late rice yielded a distinctly poor crop.	..	..	Season unfavourable. Area increased. Yield about average.	..	..
United Provinces	Rice gave an outturn of 80 per cent of normal.	Rainfall favourable in early season but dry season later on. Yield highest on record being 97 per cent.	Millets gave an outturn of 85 to 95 per cent of normal.	Autumn rains seasonable and subsequent dry season very favourable. Area largest on record and outturn nearly double the average.	Cultivation extended owing to a succession of seasons of light rainfall. Yield 75 per cent of normal.	Late monsoon and continuous rains in July retarded the growth of indigo plant. Yield 68 per cent below average
Panjab	..	Conditions favourable at beginning and end of season. Prolonged drought in middle injured crops on dry lands.	..	Prolonged monsoon favourable but failure of winter rains injured crop. Area and yield better than average.	Deficient rainfall, contracted area and early break in the rains marred prospects.	Insufficient irrigation, unfavourable weather and contracted area. Yield 54 per cent below average.
Bombay	..	Season was above the average. Monsoon late and winter rains beneficial. Yield very good.	..	Season favourable. Area greatly extended and yield 88 per cent above average.	Sowing rains much later than usual but season distinctly favourable.	..
Central Provinces and Berar	Yield only 49 per cent of normal.	Early break in monsoon, contracted area but some good cold weather showers improved prospects. A bumper crop, 115 per cent of normal. In Berar the contracted area was owing to failure of late rains and yield about 70 to 75 per cent of normal	Jawar gave normal yield. In Berar exceptionally good showers raised the yield up to average.	Favourable conditions. Average crop. In Berar reduced area was attributed to failure of late rains and yield was reduced by wet during harvest, being 61 per cent of a normal crop.	Sowings successful on a large area. Heavy rains damaged crop later. But season was about the average. Yield 91 per cent of normal. In Berar both area and outturn much in excess of average, though monsoon was late and late rains heavy	..
Madras	Increased area owing to favourable season. Crop generally good, something like 86 per cent of a normal crop.	..	..	Seasonable rainfall, crop fair, and outturn 72 per cent of normal.	Good and timely rainfall stimulated sowings	Cultivation declined owing to low prices. Yield 85 per cent of normal produce.

General conditions prevailing in India	On the whole fair. Both area and yield about equal to average.	Season exceptionally favourable. Good crop of last year exceeded by 20 per cent both in area and yield.	..	Generally favourable and exceptionally good for sesamum.	Opening season favourable but prospects deteriorated by late and heavy rains. Area is 27 and yield 46 per cent more than average.	Generally favourable
Bengal	Deficient rainfall in early part of season affected area. The winter rice crop 90 per cent and autumn rice 80 per cent of normal.	Season generally favourable. Crop 90 per cent of normal	..	Season favourable	Defective rainfall; at the outset favourable but late rains excessive and production low.	Conditions favourable with good late rains. Yield 65 per cent of normal.
Assam	Rainfall very favourable to the winter rice crop which yielded a bumper outturn	..	..	Scantiness of winter rains occasioned a short outturn of mustard.	Crop suffered from drought in March and April; the weather afterwards proved generally favourable.	..
United Provinces	Rice yielded 80 per cent of normal.	Heavy rain at close of the monsoon. But season remarkably favourable. Yield 75 to 80 per cent of normal.	Millets yielded 80 per cent of normal.	Extended sowing, owing to excessive moisture, and light rain benefited crops.	Late arrival of monsoon restricted area and late excessive rain damaged crop.	Late arrival of monsoon injured crop. Yield was satisfactory in the Doab.
Panjab	..	Season favourable. Area largest on record. Yield 55 per cent above average —a bumper crop.	..	Favourable conditions at sowing time but failure of winter rains seriously affected crop in the south. Elsewhere a bumper crop.	Late spring rains favourable but late excessive rain affected the yield which was still above normal.	Timely irrigation and seasonable rainfall benefited crop.
Bombay	..	Favourable rains at sowing time. Season fairly good.	..	Linseed crop fairly good. Deficient late rains affected area and yield of rapeseed.	Favourable rains extended sowing and crop fared well giving satisfactory yield.	..

Crop damaged by hail, frost and excessive rain.	Season unfavourable	Excessive rain damaged crop in Bihar. Outturn 56 per cent of normal.
Assam . . .	The various rice crops yielded good outturns in many places—well above normal.	..	..	Season not unfavourable. Area decreased. Crop fair.	Season generally favourable. Yield better than preceding year.	..
United Provinces .	..	Early conditions promising but later season disastrous owing to frost and rust. Yield 70 per cent of normal.	Millets gave outturns varying between 80 to 85 per cent of normal.	Conditions promising but crop suffered from frosts and insects.	Favourable monsoon at sowing time.	Sowings greatly contracted and excessive rain damaged crop.
Panjab . . .	..	Condition of rainfall ideal, though severe frosts injured crop, yield was more than 116 per cent.	..	Season favourable, but severe frosts were disastrous to the crop.	Sufficient rainfall extended cultivation. Yield up to average or above it. An exceptional crop.	Insufficient canal irrigation interfered with sowings.
Bombay . .	..	Insufficient sowing rains. Severe frost injured crop.	..	The crop suffered from cold and frost in Gujarat and deficient moisture in the Deccan.	Shortness of early sowing rains contracted area. Crop suffered from deficient moisture and excessive cold.	..
Central Provinces and Berar.	The rice crop of Chhattisgarh including 71 per cent of rice area gave little short of an average yield.	Rainfall favourable but spring crop injured by frost in northern districts. Crop yielded well elsewhere.	..	Unusually inclement season, frost, cloudy weather and hail-storms damaged crops seriously.	Sowing season favourable to cultivation of the Southern districts. Cotton area extended.	..
Madras . . .	Restricted area owing to failure of rains. Crop suffered from want of moisture. Yield 75 per cent of normal.	..	..	Area decreased for want of timely and sufficient rainfall. Crop generally fair.	Timely rainfall for sowings but crop suffered for want of later rains.	Scanty rains and fall in prices greatly reduced area under indigo.
Burma . . .	Sowing rains seasonable and area extended, crop suffered in places from floods and high winds. Outturn 93 per cent of normal.	..	..	..	Late heavy rains damaged crop.	..

Retail prices of salt

Generally speaking, the fluctuations in the retail prices of salt are the direct consequence of changes in the duty levied by Government. From 1861 to 1878 there was no change in most provinces. In 1878 the duty was reduced from R3-4-0 a maund in Bengal to R2-14-0, and the duty on Rajputana salt from R3-0-0 to R2-8-0. This change reduced the retail prices of salt in Bengal, the United Provinces, the Panjab, and Assam; but about the same time the duty levied on salt in Sind was raised from R0-8-0 to R2-8-0 and in Bombay from R1-13-0 to R2-8-0, so that prices rose very largely in Sind and considerably in Bombay. Since 1878 the retail prices of salt all over India except Burma have uniformly responded to changes in duty. In 1882 the rate of duty was reduced generally to R2 per maund which was raised again to R2-8-0 in 1888. The reductions to R2 again in 1903 and to R1-8-0 in 1905 had an immediate effect in bringing down retail prices. The salt tax was reduced with effect from the 20th March 1907 for the third year in succession to R1 a maund throughout the whole of India. Retail prices again fell in correspondence and the average in some provinces is now below R2 per maund. In Burma the salt revenue system is somewhat different. In the years 1888, 1889 and 1890 increases in the rates of composition duty were made with a view to raising the incidence of the tax to the same level as in India, and the prices rose considerably in those three years. Since 1890 there has been little change in the retail prices.

* The figures are estimated and refer only to certain provinces where the crops in question are extensively cultivated

PART I

NOTE ON RETAIL PRICES OF FOOD-GRAINS AND SALT

Records of prices

Prior to 1873 prices of food-grains were officially recorded in different provinces, but the statistics were not collected on any uniform plan, nor brought together in an accessible form.

Under orders of the Government of India issued in 1872 a fortnightly return of retail prices in sers per rupee for the commoner food-grains and salt in each district was instituted, and these returns have been regularly published in the *Supplement* to the Gazette of India since 1873. In 1878 a small volume was published, giving yearly average prices of food-grains for the period 1861—1876 in certain districts which were selected as typical. In 1884 the figures in the earlier volumes were revised, prices for the period 1876—1883 were added, and a new volume was published. Since that date a statement of the average prices for each year beginning from 1861 has been published annually in the volume entitled "Prices and Wages in India." Throughout the period from 1872 additions to the record have been made from time to time by increasing the number of stations from which reports regarding certain grains were required, and also by adding "Kangni" to the list.

Arrangement of the tables

Tables Nos. 1—11 shew the annual average prices of each of the ten commoner kinds of food-grains and of salt. The prices quoted are the averages of the half-monthly prices reported during the year. The districts in each province are grouped together with reference to their climatic character and rainfall, and averages are struck for each group as well as for each province.

Table No. 12 shews the annual average prices of the most important food-grains at twenty-three stations, which have been selected with a view to giving a fair indication of the general level of prices throughout each province.

Table No. 13 shews the variations of these prices, the prices of the year 1873 being taken as 100. The year 1873 marks the beginning of the great change in the relative values of gold and silver and the character of the seasons was in this year generally normal.

PART II

NOTE

WHOLESALE PRICES OF STAPLE ARTICLES OF TRADE AND CONSUMPTION

The tables in this part of the volume contain figures of the wholesale prices of some of the principal staples of the imports and exports, the wholesale prices of food-grains and other articles in Indian markets, and the price paid by the Supply and Transport Corps for articles for the consumption of troops in India.

Table No. 14—*Staple articles of Imports*—The articles in this table, though few in number, represent in their aggregate value a large share of the total import trade. On the average of the last three years the imports of cotton-goods (yarn and manufactures), of metals, and sugar represent about 56 per cent of the whole imports into India. In consequence of the development of the Indian coal-fields, foreign coal is no longer a considerable item in the import trade; and the rapid increase in the imports of kerosene oil, which began in about 1888, has been checked by the competition of oil produced in Burma. The prices quoted from 1843—1858 are taken from the Exchange Price Current. From 1859 onwards the quotations are taken for Calcutta from the Price Current and Market Report of the Bengal Chamber of Commerce. The price of coal at Bombay is taken from the Bombay Market Report, and of gold from the Calcutta Price Current and Money Market Report, and the prices of sugar—Mauritius, and silk are reported monthly by the Commissioner of Customs, Bombay. The prices quoted are those for the first week of January and July in each year, or where quotations are not available for these weeks, for the nearest period.

The average price of bar silver in London as quoted daily by the Bank of Bengal is also given in this table.

Table No. 15—This table shows the variations in the prices quoted in table No. 14, taking the prices of the year 1873 as 100. In case of articles for which the record of prices began in a year later than 1873, the price of the first year for which quotations are given is taken as 100.

Table No. 16—*Staple articles of Export*—Up to 1858 the prices in this table are taken from the Exchange Price Current. From 1859 onwards the source of the quotations is as follows :—

Calcutta :—The Price Current and Money Market Report of the Bengal Chamber of Commerce.

Bombay :—Current quotations of the Chamber of Commerce, Bombay Market Report and Trade Journal published in connection with the *Times of India*, the Current quotations of the Millowners' Association for the price of yarn and T. cloth, and a Monthly Report from the Commissioner of Customs for the price of wheat.

Karachi :—Price Current and Market Report of the Karachi Chamber of Commerce.

Madras :—Price Current and Market Report of the Madras Chamber of Commerce.

Rangoon :—Monthly Report from the Chief Collector of Customs.

The price of opium is obtained from the Finance Department.

The number of articles in this table is very much larger than the number of articles in the import table, and their aggregate value represents about 85 per cent of the total value of exports from India in the last three years.

The prices quoted are those for the first week of January and July in each year with a few exceptions which are mentioned in foot-notes below the tables.

Table No. 17—This states the variations of the prices in table No. 16, the price of 1873 (in most cases the price in March) being taken as 100. In case of articles added to the list after 1873, the price of the first year for which quotations are given is taken as 100.

Tables Nos. 18 *and* 19—*Comparison of the average prices in India and London of staple trade commodities and variations in the prices*—Table No. 18 was prepared with figures from 1870 for the consideration of the Royal Commission appointed in 1886 to enquire into the changes in the relative values of gold and silver. It was published for the first time in the volume of Prices and Wages in India in 1890.

In 1898 prices of Burma rice were substituted for those of Bengal rice.

The London prices are the annual averages of weekly quotations given in the Economist. The Indian prices quoted are all Calcutta prices except those of cotton and rice. They represent the average of weekly quotations given in the Calcutta Price Current, which is published by the Bengal Chamber of Commerce. The price of cotton is taken from the Current quotations of the Bombay Chamber of Commerce. The price quoted for Rangoon (Ngatsain and Ngakyouk) rice is the average of the prices reported in a special monthly return which is received from the Chief Collector of Customs, Rangoon.

Tables Nos. 20 *to* 22—*Average prices in London of sixteen principal staples of trade and of bar silver and variations*—Table No. 20 was prepared in 1885 for the Royal Commission mentioned above. It was reproduced in the volume of Prices and Wages in India in 1890, with the addition of two descriptions of cotton, namely, (1) Cotton, raw, Dhollera, mid, fair, and (2) cotton, upland, mid, fair.

In 1899 the following additions and alterations were made :—

1. Coffee (Ceylon) was changed to coffee (East India plantation).
2. Indigo (Bengal), Jute Linseed (Bombay), Rapeseed (Calcutta), Rice (Bengal), Silk (Surdah), Cotton—raw (Dhollera), and Shell-lac were omitted—as London prices for all these articles, except shell-lac, are shown in table No. 18.
3. Coals—Helton Wallsend, Beef—inferior, and Bar Silver were added.
4. A new table (table No. 21) shewing variations in the prices in table No. 20 was added.

The following changes in the tables were made in 1900 :—

1. Iron—Scotch pig, flour, leather, and butter were added.
2. Another new table (No. 22) shewing variations in the prices measured in silver was added.

The prices in table No. 20 are the annual averages of prices reported in the monthly Trade Supplement to the Economist.

The system on which table No. 22 is compiled is fully explained in a foot-note printed below the table.

Table No. 23—Annual wholesale prices of food-grains and other articles—Since 1897 wholesale prices of food-grains and certain other articles have been reported for selected marts in each province of India under orders issued by the Government of India in 1896. The following is a list of the articles for which fortnightly wholesale prices are reported, and the provinces from which reports are received. The number shown under each province indicates the number of marts in that province from which wholesale prices for the article in question are reported.

The prices are those governing actual wholesale transactions on the last day of each fortnight or the day preceding, and unless wholesale transactions have actually taken place within the fortnight, no prices are quoted. The definition adopted for a "wholesale transaction" is one in which not less than 10 maunds of food-grains, seeds, grass and straw, and one maund of other articles, such as turmeric, tobacco, etc., change hands. In the case of live-stock, prices are quoted for a score of sheep and for a pair of bullocks. The prices are only quoted for those marts where the article in question is a staple of local trade. The total number of articles for which wholesale prices are reported, as given in the list above, is 45, and there are 95 separate marts from which reports are received. Prices for 24 of these articles are published in the *Supplement to the Gazette of India* each fortnight. Table No. 23 contains prices for the following 23 articles :—

Rice (husked)	Ragi	Poppy seed	Jute
Wheat	Maize	Sesamum (*til or jinjili*)	Tobacco leaf
Flour (wheat)	Gram or Kadalai	Ghi	Turmeric
Barley	Arhar dál	Sugar, raw (*gur*)	Sheep
Jawar	Linseed	Sugar, refined	Plough bullocks
Bajra	Mustard and rapeseed	Cotton	

The prices given are the simple average of the half-monthly prices quoted from each reporting district.

Tables Nos. 24 *and* 25—*Wholesale prices of certain staple articles in Calcutta and variations.*—A special statement of the prices of certain staple articles in Calcutta was obtained in 1885 in connection with enquiries into the fluctuations in prices. It was incorporated in the tenth issue of Prices and Wages in India in 1893. No change has been made in the form of the table except that the prices of 2nd and 3rd class bricks, which were quoted up to 1901, have been omitted since that year. The sources from which prices for this table are taken, are stated in the note prefixed to the table.

Tables Nos. 26 *and* 27—*Annual average prices per* 100 *lb. paid by the Supply and Transport Corps, Peshâwar, Râwalpindi, Lahore, Meerut, and Lucknow Divisions, for articles for consumption by troops, and variations.*—These statistics were first prepared in 1885 in connection with the enquiry into the fluctuations in prices. They were incorporated in the tenth issue of the volume of Prices and Wages (1893) together with a table of variations. These tables have continued unaltered up to the present date.

NOTE.—In this table, the variations in the prices of gold (measured in silver) are arrived at by multiplying the price of bar silver in London in 1873 ($=59\frac{3}{16}d.$) by 100 and dividing the product by the price of bar silver in the particular year

Example—

Price of silver in 1899 $=27\frac{13}{16}d.$ (table No. 20); price of silver in 1873$=59\frac{3}{16}d.$; price of gold in 1873=100. The variation in the price of gold in 1899 is then worked out thus—

$27\frac{13}{16} : 59\frac{3}{16} :: 100 : 215$

The variations in the prices of the other articles in this table are calculated thus: *As* the variation in the price of gold in table No. 21 *is to* the variation in the price of gold in this table *so is* the variation in the price of the article in table No. 21 *to* the variation required

Example—

Variation in the price of gold in table No. 21=100; variation in the price of gold (measured in silver) in 1899, in this table =215 variation in the price of copper (measured in gold) in 1899=86 (table No. 21). Therefore

$100 : 215 :: 86 : 185$

(*a*) Price of 1874 is taken as 100

PART III

WAGES

NOTE

The statistics of wages presented in table No. 28, and its subsidiary tables Nos. 29 and 30, are compiled from half-yearly returns, received from District officers, purporting to show for each district the average for the preceding six months of the wages per month of certain labourers and artizans. By far the most important class of labour is agricultural, and the record obtained entirely fails to give a reliable indication of the remuneration of the labourers. This result is due to the inherent difficulties of the problem, and the practical impossibility of getting the untrained reporting agency to make the necessary allowances for the varying conditions of employment. Payment in kind is commonly practised, either for the entire wage, or as a supplement to cash wages, and the supplements vary according to the season and the nature of the employment. The regularity of employment also varies greatly, and employment is practically nowhere continuous throughout the year. The most common expedient for avoiding these, and other difficulties, is to return cash wages for labourers employed in towns or their neighbourhood, which are in no way typical of the rates prevailing throughout the district. The same difficulties are also encountered in collecting information as to the wages earned by village artizans, and the results are further vitiated by assuming that masons, carpenters, and blacksmiths necessarily earn the same wages. The wages of horse-keepers are recorded with the least inaccuracy, but even if they are taken as typical of the wages of domestic service generally, the class represented is unimportant.

The selection of the districts, for which figures are published in the tables, is also faulty, as the districts are not typical of tracts having similar economic conditions, but are those originally selected according to their climatic character and rainfall for making returns of the prices of food-grains.

Measures are now being taken to replace the present faulty returns by more scientific methods of investigation, whose object will be to ascertain the standard rates of wages in each district or homogeneous tract, and to observe permanent changes in those standard rates as distinct from short period fluctuations. The most important feature of the new method is a regular wages census to be conducted once in five years.

Tables Nos. 31 and 32 are the record of wages paid in certain State Railways and Government Establishments as well as in some Industrial Establishments in various parts of the country.

The figures in table No. 31 are reported annually by the Director General of Post Office, the Railway Board, the Irrigation Department of the Government of Bengal, and the Accountant General, Military Department; and those in table No. 32 are supplied by the owners or managers of the different industrial concerns.
